

UAP 1* Cylinder

Featuring anti-drill, anti-bump and anti-pick systems, the UAP 6 pin cylinder provides high levels of security to any entrance door, while remaining a competitive solution for fabricators and installers. The UAP cylinders hold the Secured by Design standard, and have been tested to EN1303:2005.

Features and Specifications:

- BSi 1* Kitemarked – KM561977
- Secured by Design approved and 1 hour fire rated
- Supplied with 3 keys
- Sacrificial cut lines on both sides of the cylinder
- The cylinder is reversible and can be fitted either way around – reduces stock holding
- Patented anti-bump feature
- 3 anti-pick pins per side and 4 hardened steel anti-drill pins per side
- Unrestricted keyway makes it easier for customers to get keys cut
- Over 800,000 different key combinations
