

Hinge Protector Liniar Systems

Specifically designed for Liniar window systems, the Apex Hinge Protector strengthens the security solution for casement windows whether it's meeting the requirements of PAS 24 or simply enhancing security and visual confidence.

Features

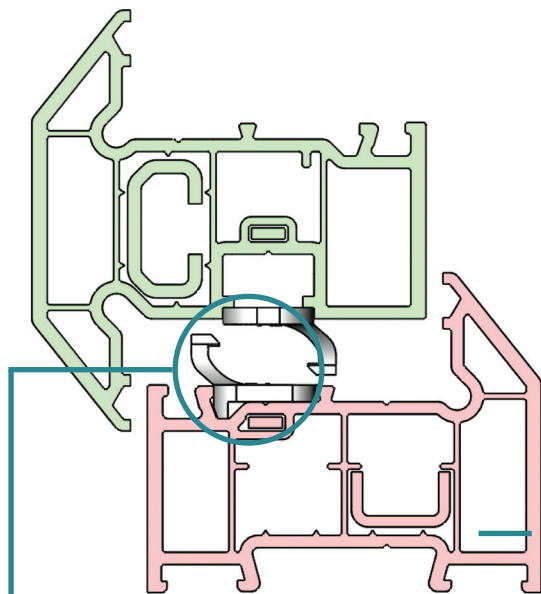

- Passive hinge protection for enhanced window security.
- Extended back leg to avoid twisting and rolling when under load during attack or test conditions.
- Profile-specific design snaps securely into position on both the frame and sash.
- Suitable for 17mm air gaps.
- Designed for Liniar Storm and Liniar Flush window systems.
- Does not affect the opening or closing performance of the hinge.
- No routing required for faster, simpler installation.
- Easy to fit.
- One-piece design with no interlocking components.

Features

- Solid metal construction for long-term durability.
- Designed to achieve PAS 24.
- 10 year mechanical guarantee.

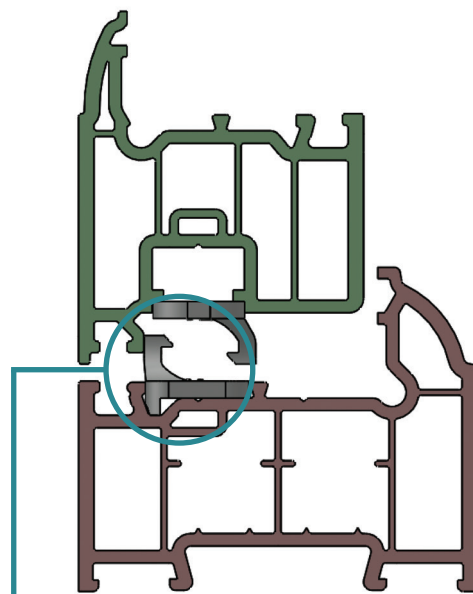

Linlar Standard Casement

Snap in friction fit with extended leg to prevent twisting under load

Linlar Flush Casement

Snap in friction fit with extended leg to prevent twisting under load
